

South Africa: Senior Adviser to Renewable Energy Programme in South Africa

As senior adviser you will collaborate closely with senior South African authorities in the Department of Energy (DOE) in providing policy advisory services on renewable energy and energy efficiency. You should hold a relevant master's degree and must have solid experience within renewable energy, energy efficiency, and/or energy/environmental regulation, and preferably working experience from developing countries. Proficiency in spoken and written English is essential.

Application deadline: 10th September 2013 at 12.00 am (CEST).

A full job description is available [here](#), where you also will be able to find information about the mandatory application procedure.
