

New booklet on Danish Energy Policy

Today, the Danish Energy Agency publish a new booklet on Danish energy policy.

The booklet describes Danish energy policy from the first oil crisis in 1973 until today and the results achieved regarding use of renewable energy and energy efficiency. Besides, the booklet describes the new Danish energy agreement and the expected effect of this agreement by 2020.

The booklet is available in [pdf](#) and can soon be ordered in print version [here](#)
