

## Danish production of natural gas fell in 2009

In 2009, Danish North Sea fields produced 8.0 bn. Nm<sup>3</sup> natural gas. This is a decrease of 16.5% compared with 2008. The decrease was in particular due to less sales of natural gas for exports, but also lower domestic natural gas consumption in 2009.

In 2009, domestic natural gas consumption fell by 3.9% to 4.2 bn. Nm<sup>3</sup>. Exports of natural gas fell by 27.4% due to a significant drop in exports to Germany and the Netherlands.

**Exports of natural gas:**

Mill. Nm <sup>3</sup>	Total	The Netherlands	Sweden	Germany
5,288	2,127	883	2,279	4,964
2,164	924	1,876	4,282	2,161
954	1,168	5,229	2,032	866
2,331	3,798	1,56	1,156	1,082

**More detailed information:**

The Danish Energy Agency publishes monthly information about natural gas supply and consumption on its website. The sources of these statistics are DONG and Energinet.dk. The monthly natural gas statistics contain the following information:

- Natural gas production
- Imports and exports of natural gas by country
- Stock changes
- Domestic natural gas consumption by three regions

The [associated webpage](#) contains information for the period January to December 2009.
