

Before the end of 2016 the Danish Energy Agency will conduct a pilot tender of price premiums for electricity from 20 MW solar PV of which 2.4 MW can be placed in Germany.

Invitation for consultation on a Danish pilot tender for solar PV

The Danish Energy Agency invites comments and questions on the draft tender material for a pilot tender for solar PV installation.

Before the end of 2016 the Danish Energy Agency will conduct a pilot tender of price premiums for electricity from 20 MW solar PV of which 2.4 MW can be placed in Germany. The Danish Energy Agency invites the solar industry and other interested parties to send in comments and questions on the draft tender material for the pilot tender.

All comments to the draft tender material for the pilot tender will be taken into consideration in the preparation of the final material. The room for changes in the tender material is however limited, as some conditions follow from the cooperation agreement between Denmark and Germany and as some changes may result in a delay of the approval process at the European Commission.

Comments and questions to the tender material for the pilot tender should be sent to SolarPV@ens.dk no later than Monday 12 September 2016.
