

# Great interest in participating in the bidding of Kriegers Flak offshore wind farm

**DEA has today received 8 number of applications for prequalification to participate in the tender for Denmark's largest offshore wind farm Kriegers Flak , totaling an installed capacity of 600 MW.**

DEA has today received 8 number of applications for prequalification to participate in the tender for Denmark's largest offshore wind farm Kriegers Flak , totaling an installed capacity of 600 MW.

This is the largest number of applicants for the tender of a wind farm in the Danish wind history.

The great interest shows that Denmark offers attractive framework conditions and an effective and transparent bidding process.

DEA will now examine whether the applications meet the economic, financial and technical minimum criteria in the contract notice from May 6 2015.

Pending the outcome , the Energy Authority will inform applicants and subsequently publish the names of the candidates who are pre-qualified to participate .

The tender for the Kriegers Flak will take over a year and involves a negotiation process with the bidders. The final and binding offers must be submitted on Nov. 8, 2016 .

[Information on the tender process and the Kriegers Flak project is available at the DEA's website.](#)
