

The Danish Energy Agency releases the time schedule and tender documents for the forthcoming Danish technology neutral tender

The Danish Energy Agency kicks off the tender process for the forthcoming technology neutral tender with the release of the tender documents. The forthcoming technology neutral tender will be held in the autumn 2021.

A single technology neutral tender will be held in 2021 combining the allocated funds for 2020 and 2021. In the tender the total potential aid can reach DKK 1.2 billion (2020 prices) and projects with a combined capacity of 428 MW (onshore wind equivalent) can receive aid in the tender. Both solar PV, onshore wind turbines, open door offshore wind turbines, wave power plants and hydroelectric power plans can participate.

The forthcoming technology neutral tender is expected to open in August 2021 with a deadline for bids in October 2021.
