The Danish Energy Agency publishes an English version of the tender material for tender of licenses for investigation and CO₂ storage

The Danish Energy Agency has made an English version of the tender material for Denmark's first tender of licenses for investigation and CO₂ storage available on its website.

An English translation of the tender material is now available on the [Danish](#)

[Energy Agency's CCS webpage.](#)

The Danish Energy Agency has received a number of questions related to the tender material in response to the opening of the tender on 15th August. Consequently, the Danish Energy Agency has compiled a FAQ, containing all of the submitted questions and the Danish Energy Agency's answers. The FAQ has been uploaded alongside the translated tender material.
