by Nord Stream 2 AG and Rambøll

18.55 Questions & Answers

19.30 End of meeting

Background

Legislation

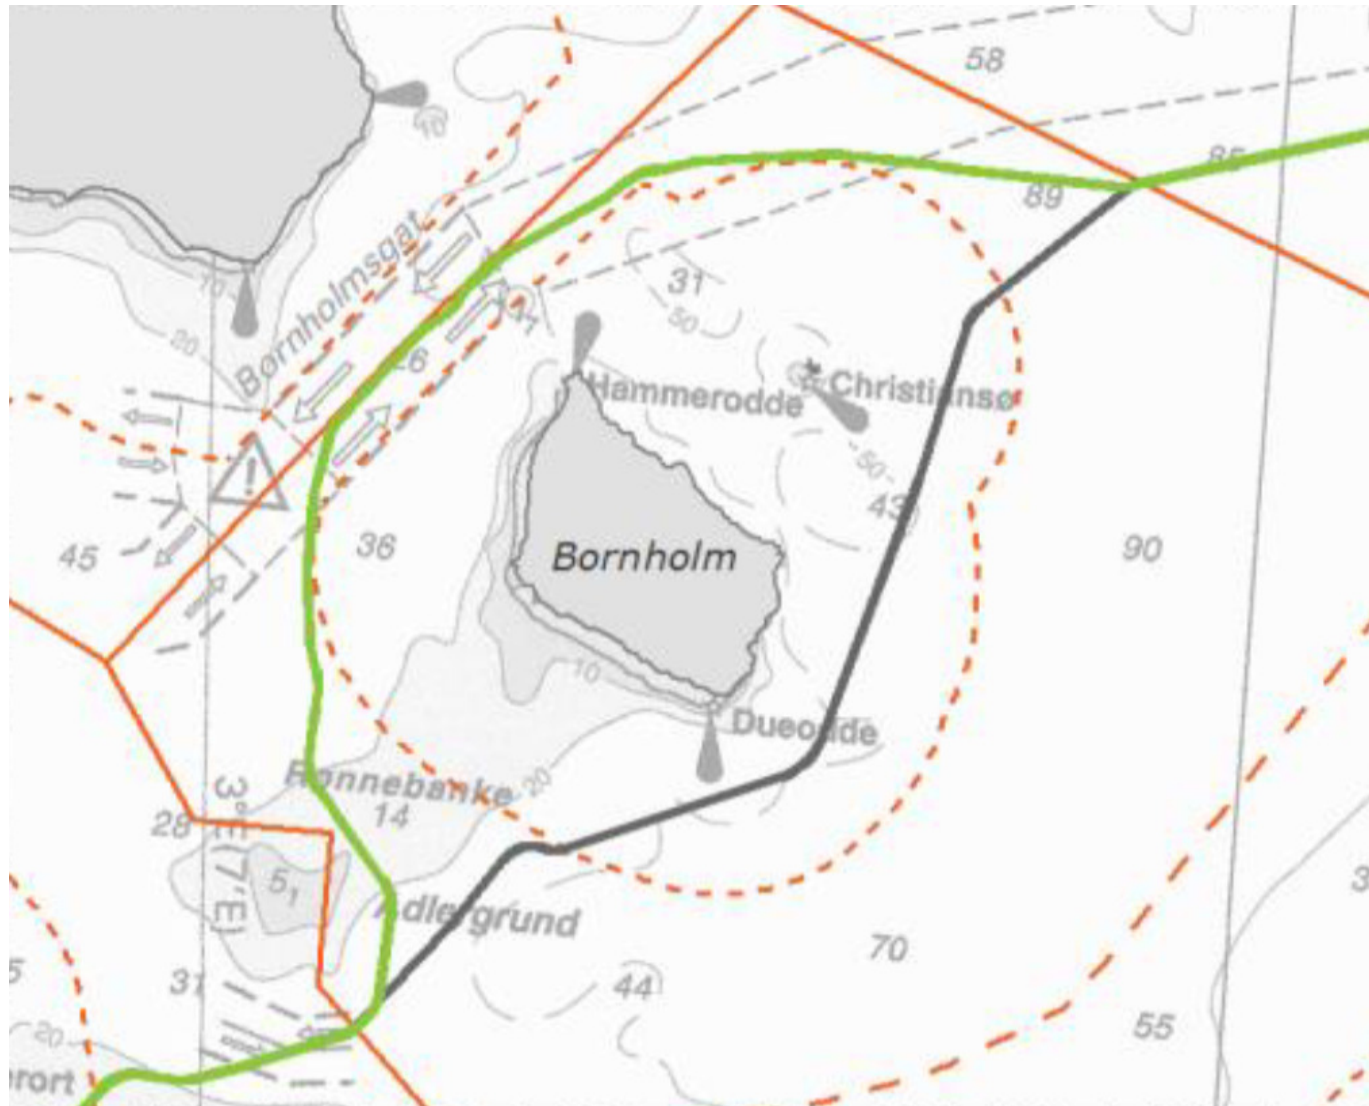

EIA

Process

Energistyrelsen
Danish Energy Agency

Background

Legislation

Permission to establish pipelines at sea refer under the Ministry of Energy, Utilities and Climate.

Permission is granted pursuant to section 4 of the Continental Shelf Act.

An assessment of the impact on the environment (EIA) must be made.

Prepared by the developer.

The EIA-report must:

- Describe and evaluate a project's direct and indirect environmental impact.
- Cover impacts both inside and outside the Danish territory.

The information in the EIA must include:

- 1) Population and human health,
- 2) biodiversity,
- 3) land, soil, water, air and climate,
- 4) material assets, cultural heritage and landscape and
- 5) the interaction between the factors in no. 1-4.

The EIA-report is now in public consultation and the consultation responses can be sent to the Danish Energy Agency.

The finalized EIA-process, can result in:

- Terms of the license
- Minor adjustments of the project
- Terms of environmental monitoring

Process

- 10 Aug. Danish Energy Agency receives the application
- 17 Oct. Start of consultation (National and Espoo)
- 14 Nov. Public meeting is held
- 12 Dec. National consultation ends
- 19 Dec. Espoo-consultation ends

Questions to the Danish
Energy Agency can be
