

Webinar  
regarding the first  
tender of the CCUS Fund  
(KEI20)  
2 May 2022

# The political framework for the CCUS Fund

## *The political agreement*

With the climate agreement for energy and industry of 22 June 2020 (KEI20), a broad majority in the Danish parliament agreed to invest massively in the future technologies and therefore established a market-based fund of DKK 16 billion to support capture, use and storage of CO<sub>2</sub> (CCUS).

With the CCUS fund the first steps are taken for the capture, transport and storage of CO<sub>2</sub> in Denmark, which is essential for Denmark to be able to achieve climate neutrality by 2050.

The first tender of the CCUS fund aims to realize CO<sub>2</sub> reductions of at least DKK 0.4 million tonnes annually from 2025. The next phase (or tender) will be designed later.

# The market dialogue

## *A phase for analysis*

- The Danish Energy Agency has held a two market dialogues.
- The market dialogues have been useful for preparing the tender material.
- The following topics have been particularly prominent in the market dialogues:
  - The timeline for establishing CCS in Denmark
  - Danish storage in a 2025 perspective
  - Municipal waste incineration and biomass plants
  - Small point sources
  - Penalty conditions
- We really appreciate all the inputs!

# Next steps for the Danish Energy Agency

## *The tender process*

- The tender material is published on TED on Monday, 2 May.
- Tender with negotiations consists of a prequalification phase and a bidding phase:
  1. Prequalification phase:
    - The first information meeting will be held on 20 May. The invitation will be send with an agenda via EU-Supply.
    - Application deadline for prequalification is on 10 June
    - The evaluation of received applications (June)
    - Prequalification of the tenders (max 5)

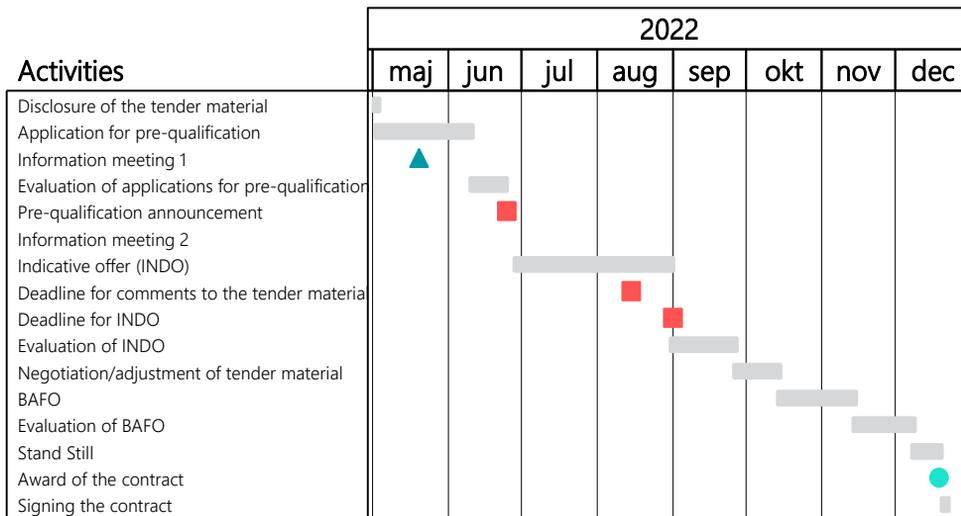

# Next steps for the Danish Energy Agency

## *The tender process*

### 2. Bidding phase:

- The second information meeting will be held before the tender deadline (date TBC)
- First indicative offer (INDO) ultimo august
- Evaluation of the bids from the prequalified tenders (INDO)
- Negotiations are expected to be held from early October
- Adjustments of the tender material and publication
- Best and final offer (BAFO) mid November
- Evaluation of BAFO
- The contract is expected to be signed in December

# Time schedule for tender

# Question and Answers tender paradigm

*Communication between the bidder(s) and the Danish Energy Agency*

1. The tender material is available on [www.eu.eu-supply.com](http://www.eu.eu-supply.com)
2. **All correspondence** between bidders and the Danish Energy Agency **must** go through EU-supply
3. Questions and answers will be published on the portal.  
*Confidential material will be removed and anonymized*
4. Questions will be replied to until 1 June as part of the pre-qualification
5. Response time depends on the complexity of the question.  
*Danish Energy Agency strives to respond within 5 working days.*
