## MEMO

# DANISH OFFSHORE WIND 2030. SCOPE OF WORKS FOR SEABED INVESTIGATIONS

Energinet has been instructed by the Danish Energy Agency to conduct seabed investigations for the offshore wind farm projects:

- North Sea I
- Kattegat
- Hesselø South
- Kriegers Flak II

Energinet has organized the work in a program nominated *Danish Offshore Wind 2030*.

This memo presents the scope of works for some of the geoscientific seabed investigations for the offshore wind farm projects in the program *Danish Offshore Wind 2030*. In this context, the investigations include the following activities:

- Offshore wind farm, geophysical site survey
- Offshore wind farm, preliminary geotechnical investigations
- Export cable corridors, cable route survey

The purpose of this memo is to inform concession developers about the scope, quantities, and qualities of a selected set of relevant seabed investigations.

The results of the seabed investigations will be notified and issued via the Danish Energy Agency.

### Disclaimer

The scope of work descriptions - presented in Enclosure A to D - are subject to change. All modifications have been accepted by Energinet such that the activities still align with the instruction issued to Energinet from the Danish Energy Agency.
