

Download and install Azure Storage Explorer: <https://azure.microsoft.com/en-us/products/storage/storage-explorer>

2: Open Storage Explorer

3: Click the *Open Connect Dialog* button:

4: From the menu, choose *Blob container*.

5: Choose **Anonymously**.

Select Connection Method

Select Resource > **Select Connection Method** > Enter Connection Info

How will you connect to the blob container?

Sign in using Azure Active Directory (Azure AD)

Shared access signature URL (SAS)

Anonymously (my blob container allows public access)

6. Copy the relevant URL listed below by right click and select “copy link”

Offshore wind North Sea:

<https://stdpozpublicexportprd.blob.core.windows.net/energio-nordsoen>

Offshore wind Baltic Sea (Bornholm):

<https://stdpozpublicexportprd.blob.core.windows.net/energio-bornholm>

7. Paste the link in the **Blob container or directory URL** field, then click **Next** and then **Connect**.

Enter Connection Info

Select Resource > Select Connection Method > **Enter Connection Info** > Summary

Display name:

energio-bornholm-1

Blob container or directory URL:

https://stdpozpublicexportprd.blob.core.windows.net/energio-bornholm

Back Next Cancel

8: The storage account now appears from the menu.

You can drag and drop files or use the menu to download files/folders.

You do not have permission to delete folders/files. There will also be other operations you cannot perform.

9. If needing support

Questions regarding files, contents of folders or timelines should be directed to the Danish Energy Agency.

For technical support related to data access through azure please contact azure_ENV_GEO@energinet.dk
