

Danish Energy Agency

4th exploration and CO₂ storage licensing round

FAQ – updated on 10 January 2025

In order to secure transparency during the application process, the DEA is providing an FAQ. Questions are numbered and answers are marked in *blue italics*.

Q1: Is there a minimum work program required for the awarded licences? Is new seismic data expected to be featured in the program?

A1: It is up to the applicants to offer an exploration work program they consider necessary to apply for a storage licence later on. As such, there are no minimum requirements. However, the DEA considers it unlikely that it should be possible to comprehensibly explore an area with a view to CO₂ storage without acquiring any new seismic data.

Q2: Will the list of participants in the meeting on 15 January be distributed?

A2: No, a list of participants will not be distributed.
