

APPENDIX C

TEMPLATE FOR THE TENDERER'S COMMENTS TO THE TENDER DOCUMENTS

Contract on subsidy for carbon capture, transport and Storage

Instructions for tenderers

If the tenderer should identify aspects of the tender documents that appear inappropriate, including matters that are assessed to constitute substantial risk or cost factors or are commercially inappropriate, the tenderer is requested to use the table below and to submit the completed Appendix C no later than on the date specified in paragraph 4 of the Tender specifications via the tab “Message” in the electronic tendering system. The tenderer may also enclose Appendix C (e.g. a revised or supplemental version) together with the first Indicative Offer (INDO), see the Tender specifications, paragraph 11 and 13.1.

The tenderer is free to adjust the number of rows in the table.

The tenderer is asked to prioritise the matters identified e.g. by whether the matter has a low, medium or high priority for the tenderer or by listing the matters in order of priority so that the most important matters are mentioned first. In the table, the tenderer should state the reasons why the matter(s) concerned is/are identified as substantial risk or cost factors or is/are commercially inappropriate. The tenderer is also requested to suggest alternatives.

If the tenderer indicates that the matter is a cost-driving factor, the tenderer is asked to also state the amount of costs reduced if the DEA accepts the alternative.

The tenderer is asked to carefully complete the table.

No.	Identified matters with specific reference to the tender documents	Priority (e.g. low, medium, high)	The matter presents a risk to the project	The matter is a cost-driver for the solution	The matter is commercially inappropriate	The tenderer's comments and possible change proposals	Amount of cost reduction if the tenderer's proposal is accepted
