

## Fact sheet on the result of the technology neutral tender 2019

The Danish Energy Agency (DEA) called for bids in the technology neutral tender 2019 on 27 September 2019, with a deadline for bids on 27 November 2019. The budget for the tender was DKK 258 million (2019 prices). The DEA has received in total 7 bids with projects of 135 MW onshore wind turbines and 136 MW solar PV installations (DC capacity). It is expected that 7 contracts will be signed, including 2 contracts with 72 MW onshore wind turbines, 2 contracts with 97 MW onshore wind and solar PV and 3 contracts with 83 MW solar PV installations. This corresponds to 181 MW onshore wind turbines equivalents or the electricity consumption of approx. 154,000 Danish households. The 7 contracts corresponds to DKK 157 million or 61 pct. of the tender budget and thus DKK 101 million (2019 prices) or 39 pct. of the tender budget is not allocated. The weighted average price premium of the winning bids is 1.54 øre per kWh or approx. 0.21 Eurocent per kWh.

5 December 2019

| Winners                    | Technology                | Offered price premium (øre/kWh) | Capacity (MW) | Share of budget (pct.) | Municipality         |
|----------------------------|---------------------------|---------------------------------|---------------|------------------------|----------------------|
| 1. Overgaard 1B K/S        | Onshore wind turbines     | 1.00                            | 36.0          | 7.9                    | Randers              |
| 2. Eurowind Energy A/S     | Onshore wind and solar PV | 1.48                            | *53.0         | 14.9                   | Mariagerfjord        |
| 3. Eurowind Energy A/S     | Onshore wind and solar PV | 1.48                            | **44.1        | 11.4                   | Herning og Holstebro |
| 4. Solar Park Harre ApS    | Solar PV installation     | 1.84                            | 38.1          | 5.2                    | Skive                |
| 5. Solar Park Agersted ApS | Solar PV installation     | 1.84                            | 26.4          | 3.6                    | Brønderslev          |
| 6. Solar Park Holmen ApS   | Solar PV installation     | 1.84                            | 18.2          | 2.5                    | Ringkøbing Skjern    |
| 7. Wind Estate A/S         | Onshore wind turbines     | 1.97                            | 36.0          | 15.5                   | Randers              |

\* From this 37.8 MW onshore wind turbines and 15.2 MW solar PV

\*\* From this 25.2 MW onshore wind turbines and 18.9 MW solar PV
